Consul Tremlett, in his trade report on Saigon and Coohin China for the past year, gives an interesting account of some of the anperatitions which prevail in Annam. It is bad luck for a fish to leap on board a boat; the fish must be out in two and thrown into the water again, half on either side. The capture of a porpoise is a very bad onien, for he is the messenger of infernal gods. The cries of a "Gecke," if old, are stolen 18 feet of wire rope, value \$21, on the lucky; if even, the reverse. A bird crying at night is always bail-a presage of death, in fact. This, says Consul Tremlett, is infelicitous; for some birds of the country only ory at night and all night. The squeak of a musk-rat announces visits. A cock crowing at noon foretells that well. The claim was for brokerage on the purchase plaintiff said the defendant met him in August obstruction with a number of baskets of vegetalast and asked him if he had any property to sell. He said he had, and introduced him to Mr. Sin Asin one of the owners of the property in question. An agreement was entered into for the sale and purchase, the price being \$110,000. The price at which Sin Asin had bought it was \$90,000. The payment of brokerage was made contingent on the resale of the property, that condition had not been carried out, and therefore the plaintiff was not entitled to brokerage. FROM OUR OWN CORRESPONDENT. LONDON, 26th May. To my mind political matters are in a most unsatisfactory state, and I consider the present Ministry, combined with the action of the Free Traders, directly responsible for the situation. That there had been a strong undercurrent of a demogratic and a revolutionary nature, there can be nodoubt whatever, and that this has becomes power in the state and is developing dangerous energy. there can be as little. According to the Constitution, the Sovereign indirectly, and the Cabinet directly, are responsible for the good government of the country, but as matters now work the power of the Sovereign appears to have become eliminated, and the Cabinet holds itself responsible alone to the House of Commons. Thus the party in power, being assured of its majority in that house, can do precisely what they may please. If the House of Commons represented the people it would be another thing, but when, as at present, that is just the very thing it does not do, the country-is-governed unconstitutionally, to use a mild torm. In other words, the

country is at the mercy of the democratic and revolutionary Caucuses. Let me demonstrate what I have laid down the facts which I shall submit are so patent and notent that they can only lead to one conclusion. I need not repeat what I have so often urged in previous letters, that the constitutional mode of administering the laws of the country, is by party government. Now, whatever the differences on the subject of Ireland; and unless Mr. Gladsator, he had no idea of making Ireland the question of the honr when he took office. We have

Mr. Bright had for many years entertained and advocated some strong measure of land toform in Ireland, but the Caucases were simply moved by hostility towards the great landed proprictors in England. Free Trade had caused imported corn to be laid down in England so cheap that the British farmer could not compete with the foreign producer, weighted as he was with rent and taxes. The reduction of taxation formed no part of the Radical programme, and a succession of had harvests contributed to the success of the Caudia schome, but depreciated mandarins. It became known by some means that this Bill had been concocted by Mr. Paruell. These negociations involved the unconditional release of all political "suspects" that is, of the men steeped in treason to the lips," who had set no a government based on assassination. and who openly and defiantly adjured and excited the people to resist the authority of the Queen.

It also involved the release of the convict Davitt. who had originated the Land Learne. It should be borne in mind, that the Ministry and the League had thrown off all side issues, and had entered upon open warfare. The object the Ministry had in view was to enforce the payment of rent. The Land League depended on tirely on its ability to prevent this. The weapon of the Ministry was eviction; that of the Land League, assassination. As evictions were carried out by a posse, assassination could not be brought to bear, and as the evicted were thrown on the hands of the Land League, the weak point\_in their armour was pierced. They had overshot the mark, the landlord could not relet in case of THE NEW GOVERNOR OF BUSSIAN eviction, but as he could get no rent in any case; he naturally turned on the tenants who had robbed him. An Anglo-Chinese Dictionary, published at the WALLS CARTLE, British barque, H. A. Brown.

For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been THE SAFEST AND ONLY RELIABLE PRE compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are | D tion, Liver Complaints, and all Functional Do, here given in catenso. Each and every word is rangements; extensively used in the Army and Navy fully illustrated and explained, forming exercises and highly recommended by the Medical Faculty. for students of a most instructive nature. Both the Court and Punti pronunciations are given, Stitutions, Nervous Debility, Depression, Cassitude, the accents being carefully marked on the best Pinnles. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various appli-cations and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as complaints, poorness of blood, loss of appetite, want many as any other Dictionary hitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in Chins, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties, resident in England and interested in Chine it cannot but be invaluable occasion-It comprises upwards of two thousand large
